Trans. of Vestnik Elektromyashennosti (USSR)
1958 [v. 29] no. 6, p. 46-48. (Abstract available)

DESCRIPTORS: *Batteries and components, *Alkaline
cells, Manganese compounds, Oxides.

The volt-ampere characteristics of manganese-nickel
oxide electrodes are described. Results are given
showing the effects of charging current density, elec-
trolyte concentration, discharge current density,
temperature and electrolyte composition. It is shown
that the addition of nickel oxide sharply improves the
working of the manganese oxide electrode and that such
addition is of practical interest. (Author)
